

## SAFETY WARNING

- It is possible to choke or be suffocated by an un-inflated or broken balloon.
- Children under the age of 8 years with balloons should be supervised at all times by a responsible adult.
- Always use a hand pump to inflate latex balloons.
- Adults should inflate balloons for children under the age of 8 years.
- Never put a balloon, or piece of a balloon, in or near the mouth.
- Inhaling helium is **extremely dangerous** and can cause dizziness, nausea, vomiting, loss of consciousness and death from asphyxiation.
- Always discard of broken balloons safely.
- Do not release balloons of any kind outside into the environment. Mylar balloons can interfere with the operation of electrical power lines.
- Go Style Balloons & Decorations cannot be held responsible for any accident or injury following the mis-use of balloons.

Please dispose of all  
your helium balloons  
responsibly and do  
not release into  
the environment.

*Thank you*
